Welcome Back....

In a world increasingly shaped by artificial intelligence (AI), our daily interactions and industries undergo transformative shifts. From healthcare to education, AI's presence is palpable, promising innovation but also posing significant challenges.

Over the next couple months we will explore the intricate web of international standards, regulatory landscapes, and ethical considerations as we explore how businesses navigate the AI revolution.

Advice

From Cyber Dad :

"I recently totaled up the cybersecurity books I have read, and reached 86 so far, with a number having been read twice. Yes, I do need to update the suggested readings area on this website. No, I cannot give you a #1 to read, #2, #3, etc., because it all depends on what you want to achieve. I can save you money, though. For example, for those 86 books, I would have paid about \$3000. I did not, and you don't have to either unless you are a collector or need a cool backdrop for your video presentations.

Suggestions:

#1 See an interesting title? Check out the author(s). Do they have the credentials to write on that subject, like schools, especially the wonderful school of hard knocks? Certifications?

#2 Is it the latest edition? Second editions are always better.

#3 Written in the last three years? Publishing time can add a year to the information currency. In this field, unless the book is an acclaimed classic, I would be cautious about books older than four years.

#3 Are other readers impressed? Are they verified purchasers?

#4 Is the book available at your public library?

#5 Can you get a better deal from an electronic version? The used books section? While I don't care for electronic

Blue Team Warrior

books as much, many of you do. I almost always buy used books. These books have trivial blemishes, and I am just interested in the knowledge.

#6 I also listen to audio versions, and your time may be limited. I don't get quite as much as I do from a printed version, but that is my personal learning style.!"

- Jay Carson

We had a great time at the MSP EXPO and the IT EXPO

**Next up RSA in San Francisco!
Who will we see there?**
